Offer

bimetallic radiators, design radiator, towel warmer, el. radiators, el. heating elements

Bimetallic radiators are new innovative radiators with original construction made of aluminium and inox. Their main

characteristics: high corrosion resistance, high pressure resistance, absence of flammable gas(hydrogen), high thermal efficiency.

Design radiators are offered in various models - tall vertical radiators, horizontal radiators, luxury towel warmers, hygienic radiators: all of these models are also offered in wide range of dimensions and colours.

Electrical heating elements (heaters) are electrical devices used for installation in towel warmers and radiators. Also available in different models and accessories depending on the particular usage and needs.
