Areas of Activities

Energy

Environment

Offer

Participation at international platform for energy and water experts

The REECO® Family is a powerful engine for future markets: the expansion strategy on emerging markets in Eastern, Central, and South East Europe should be followed up. The strong linkage of the REECO-Events offers the exhibitors the possibility to establish itself on new markets through familiar structures. This facilitates the know-how transfer and the market entry. We introduce only topics, that have potential for implementations, and where we can guarantee

available projects, that are presented in our Investors-Business-Lounge.
